

Access-Ability, supplier of accessibility

Made up from lightweight bonded **aluminium** extrusions, **Innotrax produces a flat uniform floor** with a parallel rail fitting and allows a **rapid installation of the seat and wheelchair restraints**.

Innotrax is available in various panel lengths to create the ultimate flooring design and is compatible with all **Unwin products**.

It can be especially tailored to suit individual transport requirements (such as accessible, care home and recreational vehicles including campervans).

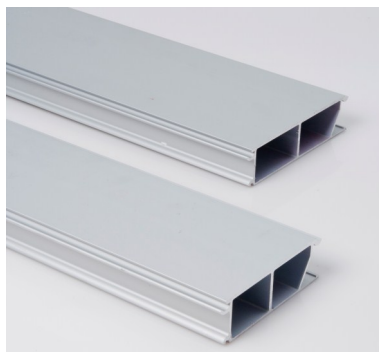

System **tested to M1 standard** across a wide range of vehicles, from 15 major vehicle manufacturers.

Characteristics

- ✓ Purpose-built floor designs to suit any vehicles
- ✓ The floor is fully secured to the vehicle with an approved structural adhesive thereby retaining the full integrity of the original manufacturer's specification
- ✓ Requires only one fixing per rail to ensure maximum structural integrity
- ✓ Improves productivity through rapid construction and ease of installation
- ✓ Increases the strength and rigidity of the vehicle body shell
