

Access-Ability, supplier of accessibility ...

T-Bolts is a one point fixing for semi-permanents seats. It can be used in conjunction with Innotrax vehicle floor base and Unwin Rail. This system is compatible with most of seats.

Characteristics

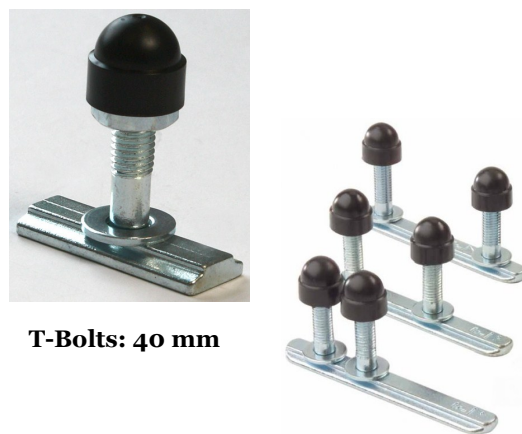

- ✓ One point fixing, compatible with all types of certified seats
- ✓ Non removable fixing for permanent seats (can be removable by loosening the nuts and sliding the seat across the rail. If seats are repositioned, the nyloc nut must be replaced)
- ✓ Very effective against vibrations
- ✓ M2 T-Bolt should be positioned at the front of the seat when used with M1 T-Bolt in order to meet M1 load regulation
- ✓ Four M2 T-Bolts can be used to secure single seats in order to meet M2 load regulation
