

The Perfolight range of portable ramps is made of **aluminum extrusion**, anodized and perforated for lightness, strength and durability.

The ramps are used to facilitate the transition of the manual or electric wheelchair, scooter, motorcycle, or other heavy loads.

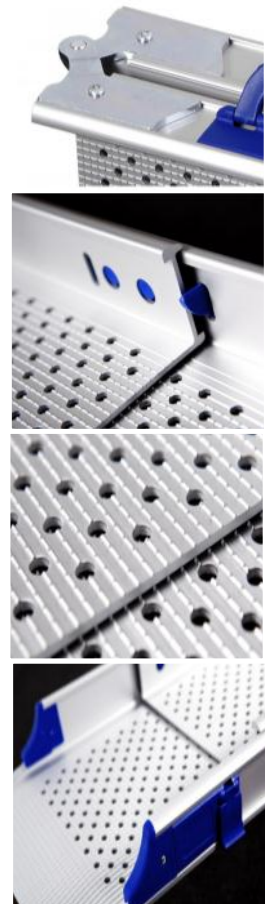

The ramps are easy to install, store and transport. They can also stay permanent.

The Perfolight range offers a large variety of ramps to meet your needs: fixed, telescopic, folding and folding telescopic (see table page 2).

Technical characteristics :

- **Non-slip surface**
The **unique non-slip surfaces** on portable ramps have been developed to create the most **non-slip ramps** possible, with the ultimate grip upward and downward rolling.
- **Easy locking**
Telescopic ramps have a locking function that is very easy to use, open and close without compromising on safety.
- **Simple and easy as Perfolight**
Perfolight is the name of the perforated portable ramps.
They have the lowest weight possible, without any loss of strength.

Dimensions and recommendations to take into account to choose the right ramp....

 All the portable ramps are adapted to be used with manual wheelchairs.

 The ramps are compatible with electric wheelchairs to insure a safely rise and slope.

 The number of steps is an essential criteria to choose the ramp.

 Length to take into account to store the ramp.

No. ARTICLE	Max Length (metre)	Min Length (metre)	Interior width (meter)	Max load Max Kg / ramp	Ramp weight (Kg)	Manual wheelchair 	Electric wheelchair 	Steps 	Ramp models
FIXED RAMPS
