Electric Sliding Door « NEW GENERATION » by Alex Original

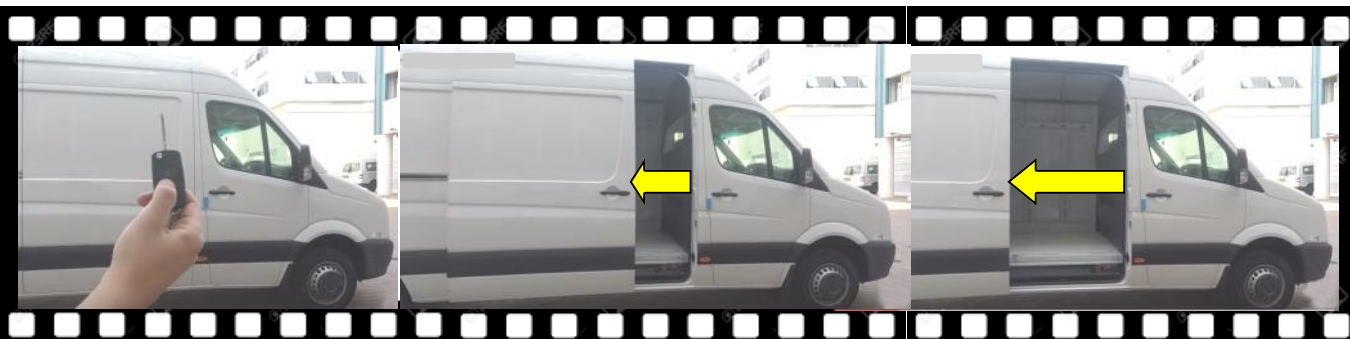

The electrical sliding door system is the perfect solution for the commuting services because it makes boarding and disembarking very easy for the passengers and the driver. The door opens and closes automatically just by pressing one button. It can be operated by remote control, door handle or by the driver's button.

Key Features:

- **Security** : the door retracts immediately if encounters an obstacle and will automatically close if the vehicle starts moving with an open door. The control lights signal « Open Door » .
- **Time saving** : quick and smooth operation by pressing just one button on a remote control, directly on the door or in the driver's cabin. The door can be operated manually at any time, if needed. Opening/Closing time about 3 seconds.
- **Easy installation** : the electric sliding door complies with the EG and United Nations Regulations.
- **Reliability** : tested for low temperatures and snow resistant.

ELECTRIC SLIDING DOOR

OPENS AND CLOSES AUTOMATICALLY WHEN PRESSING THE BUTTON
